

VIRTUAL FISART – Project Description

In the 10 years of FISART (2011 - 2020) despite the financial limitations, but with the enthusiasm, talent and participation of a very large number of artists, we had the opportunity to create in Timisoara a multitude of Street Art works, as shown extensively under the menu entry “**01 Presentation of FISART and the Results 2011-2020**” and briefly in the collage bellow.

During this period we discovered and photographed in Timisoara and partner cities around the world a very large number of locations predestined for these art events in the public space of which only a few have been used so far. A great number of available surfaces for being painted virtually and most of them also really, may be found in the included menu entries and some of them may be seen in the collage bellow.
