# THE ARTIST'S STATEMENT & THE MEANING BEHIND THE NAME

**“KSELEQOQYNQYSHY”** is an visual artist based in Bucharest, Romania.

The name **“KSELEQOQYNQYSHY”** is a coded one, written in romanian language as **“Casele cu Ochi Închiși”** which is translated **“The houses with eyes closed”**.

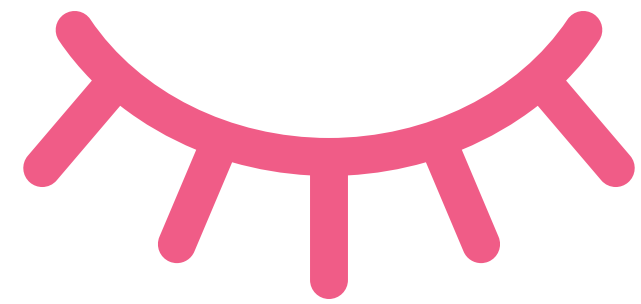

The intention of the artist to write the name in this way, is to offer the people a similar experience like reading a complicated graffiti tag. At first it makes you curious and you try to decipher it and after that it makes sense and it introduces you in the story.

The author illustrates a fantastic world full of imaginary characters and symbols.

With this project the artist creates a conscious visual journey, made in a surrealistic and playful manner, offering to the “visitors” a colorful experience combined with elements of the mystic.

In this world the artist “speaks” about the spiritual awakening, visually offering a detaching from everyday life and an exploration to the unknown world of subconscious.
