

“I make my walls BREATHE”.

I am specializing in 3D graffiti and calligraphy, known for my illusory works that create the feeling of portals to alternate universes.

My style is a unique blend of calligraphic forms, geometry, and cosmic themes. As a pioneer in this direction, I aim to uncover the hidden beauty in everyday reality, showing how profound and multifaceted the "life inside a gray wall" can be, drawing a parallel with the inner world of each person. I use art to inspire viewers to step away from daily routines and contemplate the depth of the world and the possibilities that arise when looking at the familiar from a different perspective.
